PROJECTS

SPOTIFY CLONE

Platform for listening song. Firstly create the basic structure using HTML and linked it to CSS file. Then designed the layout of our Spotify clone project by creating the header, navigation menu, main content, and footer sections. Next create the elements such as play button, volume slider etc. Finally style the pages with colors and added visual appeal to MY project

2023

- Tech Stack : **HTML, CSS**

SIMON SAYS GAME

Entertainment purpose. Basic structure created through HTML. Somewhat responsive in nature. Functionalities are added using JavaScript. Use of DOM elements such as "addEventListener" is a built-in-function in JS that allows you to attach an event handler to a specified element such as a button or a link. Colours are added through styling.
